Light rain	Light rain	Thunderstorm	Thunderstorm	Heavy rain showers	Light rain showers
Precipitation probability					
30%	40%	60%	80%	70%	40%

Forecast for Tuesday 16 Aug 2022

Weather: Another day of scattered showers and thunderstorms. These may merge into longer periods of heavy and thundery rain at times but there is significant uncertainty regarding the details and which periods of the day will be wettest. Nonetheless, where showers become slow-moving, there's the risk of localised flooding. It will feel fresher than on recent days.

Chance of cloud-free hill tops above 600m: 40%.

Low cloud and visibility: Periods of cloud obscuring tops above 600m at times with a chance of occasional patches as low as 500m on any north facing slopes. Southern parts of the Brecon Beacons may only see occasional patches above 750m. Often very good visibility outside of any rain, however occasionally poor in thunderstorms and very poor in cloud.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Prepare for sudden downpours by taking waterproof clothing. Thundery showers may develop rapidly without much notice, so it is worth being aware of what to do if caught in a sudden thunderstorm. In any sunshine, UV levels will rise to high, so sun protection will still be required.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
02:00 on Tue 16 Aug 2022	11.4mm	11.4mm	11.4mm

Forecast for Wednesday 17 Aug 2022

Weather: Cloudy with a chance of rain or thunderstorms during the early hours and possibly staying damp for much of the morning. Skies brightening up by midday to leave a dry afternoon with increasing amounts of sunshine to end the day.

Maximum wind: Northerly or north-easterly 20-25 mph with gusts of up to 35mph on summits at first. Easing to north-easterly 10-15 mph later.

Chance of cloud-free hill tops 600m: 30% during the morning, rising to 80% by late afternoon.

Low cloud and visibility: Fairly extensive above 500m at first. Cloud lifting to periods above 700m by midday and becoming patches above 800-900m by the end of the afternoon. Most summits clearing by the evening. Generally very good visibility with excellent air clarity allowing distant hills to be clearly visible. Very poor in early cloud and locally poor in morning drizzle.

Temperature: **Valleys:** Plus 11 Celsius rising to plus 20 Celsius.
At 600m: Plus 11 Celsius rising to plus 15 Celsius.
Freezing level: Above the summits.
